Parliament Voting System

run "python manage.py runserver" in ParliamentElections/

and open "http://127.0.0.1:8000/adminlogin/" to open admin login page
and "http://127.0.0.1:8000/login/" to open voter login page.

This system consists of two types of account.
1. Admin account who has the right to create an election session, verify
candidates, clear the ambiguity in the results, and end elections.
2. Student account who can register on the portal and register itself as a
candidate, load its resume and participate in voting.
